            <company>Brownbag Marketing February 2023 - August 2024</company>
            <title>  Frontend Developer</title>
            <learned>
                    Worked on the creative team at Brownbag Marketing. Collaborated with Designers,
                    Copywriters, and Account Directors to create stunning websites. Pushed the team
                    on implimenting 3D assets into web designes. As a Frontend Developer I worked on creating
                    websites from figma files given to me by the design team. Worked in tandem with designers to collaborate
                    on adding animation and altering the design if needed to be responsive.

                    When I wasn't developing websites I was creating 2D/3D social animations and 2D/3D various web assets.
                    I also worked as a secondary Videographer on corperate commercial sets.
